ACADEMIC INTERNSHIP PROGRAM

The Schenectady County Academic Internship Program is designed to place high school, community college, and university students within County government departments as student interns for the completion of specific projects, research, or studies to provide an opportunity for students to learn about public sector careers!

These internships are unpaid and projects are carefully designed by each department in conjunction with the intern to ensure a practical and meaningful work experience. Participants normally spend between 8-16 hours per week at their internship, unless otherwise arranged.
