

SCHENECTADY COUNTY SUBSTANCE ABUSE PREVENTION COALITION

"For the prevention of substance abuse and the promotion of mental, emotional and behavioral health."

Are you aware of what is being done to prevent substance abuse in our area?

The Schenectady County Substance Abuse Prevention Coalition was formed by our county legislators and includes leaders in county departments along with community agencies and concerned community members.

Our mission is to prevent substance abuse and to promote positive mental health.

The County Coalition maintains a FB page to keep the general community informed, provides presentations, works with community based coalitions and distributes resource materials throughout the county. Coalition staff are available to consult with and to collaborate with all residents of the County. We are in place to serve the community but we will only achieve our goals if the community is actively involved.

Have you thought about how you might help?

What concerns do you see in your community?
